The Examiner asserts that Claims 1-19 are rejected under 35 U.S.C. §103(a) as being unpatentable over Posa, et al., U.S. Patent No. 6,633,741, based on provisional application no. 60/219,381, filed on July 19, 2000 (Posa), in view of Winsky, et al., U.S. Patent No. 5,774,109 (Winsky). The Examiner asserts that Claim 20 is rejected under 35 U.S.C. §102(b) as being anticipated by Reynolds, et al., WO98/18086 (Reynolds).

Applicant respectfully submits that the present invention, as defined by independent Claim 21, is patentable over Posa, Winksy, Reynolds, and any combination of same.

Applicant respectfully submits that Posa, Winksy, Reynolds, and any combination of same, do not disclose or suggest many of the specifically recited features of independent Claim 21 and, therefore, Posa, Winksy, Reynolds,

and any combination of same, do not disclose or suggest all of the features of independent Claim 21.

Applicant respectfully submits that Posa, Winksy Reynolds, and any combination of same, do not disclose or suggest an electronic book apparatus, comprising a processing device, wherein the processing device processes a reading termination instruction, and further wherein the processing device terminates a presentation of the book information in response to the reading termination instruction, and further wherein the processing device identifies and stores information regarding a first location in the book information where the presentation of the book information is terminated, and further wherein a subsequent presentation of the book information commences from a second location in the book information, wherein the subsequent presentation of the book information includes a re-presentation of an amount of book information previously presented to the user, and further wherein the amount of the re-presentation of book information previously presented to the user is programmably selected by the user, all of which features are specifically recited features of independent Claim 21.

As noted above, Posa, Winksy, Reynolds, and any combination of same, do not disclose or suggest all of the features of independent Claim 21. Since each of Claims 22-40 incorporate all of the limitations of independent Claim 21, Applicant further submits that Posa, Winksy, Reynolds, and any combination of same, do not disclose or suggest all of the features of each of the dependent Claims 22-40.

In view of the foregoing, Applicant respectfully submits that dependent Claims 22-40 are patentable over Posa, Winksy, Reynolds, and any combination of same. Allowance of Claims 22-40 is, therefore, respectfully requested.
